Outline of the policy plan Please answer the questions below or provide an URL to the policy plan after the last question about the policy plan. The online policy plan should at least provide answers to the questions about the policy plan asked here.	
What are the institution's activities? When are which activities to be carried out? And how do the activities contribute to achieving the institution's objective?	We work towards a unique, federal Europe where everyone has equal chances to fulfil their unique potential. By uniting our strengths democratically, we strive to form a strong, responsible and transparent European government that acts in the interest of all Europeans. We believe in reforming Europe to build a true European democracy. We are working towards building a stronger European Parliament with the power of proposing new laws and electing a European Prime Minister, that will be held accountable in front of all European citizens. We think we can shape Europe into a society where the highest standards of human, social, environmental, and technical developments are achieved. Our goal is to get our own political faction in the European Parliament in 2025. Volt competed in the European Parliament elections in 2024 for the second time and we led a cross-border election campaign with a European election programme.
How does the organisation generate income or revenue?	Volt Europa is generating its income primarily through membership fees and donations. All donations above EUR 3'000 (per calendar year) are published on our transparency website: https://www.volteuropa.org/transparency.

Most notable, the European Parliament elections. Volt Europa also supports the national chapters in their preparations for elections and political participation in general. Expenses are spent on personnel, information technology and events mainly. If yearly revenues are not exhausted, they are dedicated to the reserves and included in the expenses of coming years.
